Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

1. (Original) A non-thermal plasma reactor for the treatment of a gaseous medium comprising

a plurality of double-sided filter elements in a stack, the elements acting as electrodes of the reactor and being connectable alternately to high voltage and earth, and

provided with a dielectric barrier between successive filter elements

wherein the gaseous medium is constrained to flow into the filter elements through both sides thereof.

- 2. (Original) A reactor according to claim 1 wherein the filter elements are annular.
- 3. (Currently Amended) A reactor according to claim 1 or 2 wherein the filter elements are hollow.
- 4. (Currently Amended) A vehicle, ship or power generation unit comprising a reactor according to <u>claim 1</u> any one of <u>claims 1 to 3</u>.
- 5. (Currently Amended) A method for treating a gaseous medium to remove particulates comprising passing the gaseous medium through a reactor according to claim 1 any one of claims 1 to 3 and generating a plasma in the reactor intermittently or continuously.
